Abstract

This study examines the factors associated with the trend of prioritizing government job compares to private job among university students. For this, this study collected primary data form four public Universities. For collecting data, this study used questionnaire based on Likert scale and demographic factors. Social status, job security, family request, power/money, the desire to serve public, working environment, family pressure, guidance of the teachers, study level, study hour, working skill, balance of subject to job, factors obstacles to becoming entrepreneur, student level of agreement to be an entrepreneur are the principal component of analysis and interpretation of data. After analyzing and evaluating data, empirical results show that, Students of arts and social science faculty prioritize government job more than other faculties students. Most of the students prioritize government job for better job security and do not prioritize private job for less job security. More than 90% students agree to be an entrepreneur if they get initial capital and training from the government. This report helps students, guardians and the policymakers of Bangladesh to re-think the underrepresented social issues in designing and enriching the educational environment, professional specialization and working environment.
